ABOUT ME

I live in Høll with my partner, Louise, and our dog, Tinka. We're eagerly anticipating the arrival of a new family member this May. In a short time, my life has undergone significant changes that have reshaped my priorities. Today, I place a higher value on flexibility, and I cherish my time away from work even more. That doesn't stop me from pouring my heart and soul into my work—I take great pride in delivering well-executed results. I've never achieved success without hard work, and my determination only becomes an asset when facing new challenges. At the same time, I'm not hesitant to seek help when obstacles turn out to be bigger than expected. I'm committed to building strong bonds with my colleagues and always aim to lift the mood, because I believe life is too short for endless complaints—unless you're actively working on solutions.

EXPERIENCES

Embedded Firmware Developer

JE electronic A/S

Feb. 2022 – Now

Vinding

I collaborated with clients on innovative industrial products, including an intelligent rat trap that transmits capture data online to notify end users. I also developed supporting software—production tools, remote firmware updates, backend servers, and a label printer program that generates serial numbers. The project involved roughly 70% firmware and 30% software development, showcasing a blend of technical expertise and creativity.

Tutor, The Study Café at Aarhus TECH

Aarhus University

Sep. 2021 – Dec. 2021

IT-byen Katrinebjerg

I support first and second semester students in our study café, an initiative designed especially for those enrolled in the Electronics, Software, Electrical Energy Technology, and Health Technology programs.

Student Representative on the Academic Council at Aarhus TECH

Aarhus University

Sep. 2021 – Nov. 2021

Aarhus

Internship: Advanced monitoring solutions for individuals with dementia in home care

Pressalit

Feb. 2020 – Jul. 2020
